## Great Basin Fire Potential Summary

ERC's remain near or beyond the 97th percentile across a large portion of Idaho and western Wyoming into far northern Nevada and Utah. With ongoing fires in Idaho and western Wyoming into northern Utah, there is the potential for significant growth still in the coming days as drier and warmer weather returns.

Moist conditions are expected to continue across southern portions of Utah, Nevada and the Arizona Strip this week with drier weather returning region-wide this weekend into early next week.

**A Fuel and Fire Behavior Advisory** is also in effect for the Northern half of Nevada, Southern Idaho and Northwest Utah.
